

# Changing tables

## 5 MINUTE GUIDE TO ...

A changing table is a nursery essential for cleaning up bub and keeping your change needs – like nappies, wipes and a change of clothes – in one place.

Make sure the table stands at a comfortable height and if the unit has wheels, ensure there's an effective locking system. Extra features to look for include raised sides for safety and a padded mat for baby's comfort.

As well as being durable and easy to clean, your table should offer plenty of storage. The more organised you are, the happier you – and baby! – will be.
